FOR IMMEDIATE RELEASE

CHARLOTTE, N.C.-- Earlex®, Inc. proudly presents “The New Way to Spray” paint with the introduction of their complete range of HVLP (High Volume/Low Pressure) Spray Stations. Earlex is a world leader and pioneer in HVLP spraying technology due to its innovative products that deliver a high level of efficiency in application that save both time and money.

Earlex HVLP Spray Stations are recognized worldwide as the technology that is quickly replacing noisy, heavy, vibrating electric buzz guns. Earlex Spray Stations are designed for a wide range of painting projects - from detail work such as painting furniture, doors or windows to large inside and outside surfaces like walls, ceilings or decks - with little to no previous experience required.

Features and benefits of the Earlex Spray Station line include:

- Sprays paint as fine as 1” and up to 12” wide
- 98% paint transfer efficiency- saves up to 30% in material cost vs. buzz guns
- Virtually zero overspray
- No bounce back due to low pressure and overspray
- Lightweight gun for easier spraying and greater precision
- No experience necessary

- On-board storage for hose, spray gun and power cord
- Three adjustable spray patterns: vertical, horizontal and round

EARLEX® HVLP SPRAY STATION LINE ADD 1

A powerful turbine motor supplies the HVLP spray gun with a constant airflow at less than 2 psi. This technique allows the sprayed paint to be distributed evenly despite varying viscosities, giving a fast, professional finish with no brush marks. The air jacket around the paint ensures the overspray is minimal and gives the user optimum control of the spray. The spray guns rarely clog and clean up is “faster than a paint brush.”

The Earlex HVLP Spray Station line can apply a wide variety of paints including latex, lacquer, varnish, enamel, acrylic, fence and deck stain, polyurethane and many more. The viscosity of some of these paints prevents the use with electric buzz guns.

About the Spray Station Line

- **HVLP Spray Station 500-** An entry-level system that is perfect for first time users.
- **HVLP Spray Station 3000- Perfect** for DIY use, interior/exterior applications in a home or apartment setting. Features a plastic spray gun with 1-qt plastic pot and one additional plastic pot.
- **HVLP Spray Station Pro 5000-** A professional unit that can also be used by serious DIY enthusiasts as well as builders, remodelers and furniture makers. Includes a pro-style metal spray gun, a quick release latch for quick removal of the 1-qt Teflon coated paint pot.

The MSRP for the Earlex HVLP Spray Station line starts as low as \$179.99.
