THE INDUSTRIES "BIBLE"

EVERYONE COMES TO YOU FOR HELP. YOU'RE THE MASTER...THE NINJA...THE GURU...YOU'RE OUR KIND OF GUY!

KBC TOOLS IS EXTREMELY HAPPY TO PROMOTE THE GREATEST BOOK YOU'LL EVER NEED. THE METALWORKING INDUSTRY'S "BIBLE". THE MACHINERY'S HANDBOOK IS THE MOST POPULAR ENGINEERING REFERENCE BOOK OF ALL TIME AND IS CONSIDERED THE STANDARD REFERENCE FOR THE MECHANICAL INDUSTRIES WORLDWIDE. THE NEW 28TH EDITION REMAINS TRUE TO THE HANDBOOK'S ORIGINAL DESIGN AS AN EXTRAORDINARILY COMPREHENSIVE YET PRACTICAL AND EASY-TO-USE REFERENCE FOR MECHANICAL AND MANUFACTURING ENGINEERS, DESIGNERS, DRAFTSMEN, TOOLMAKERS, AND MACHINISTS. THE MACHINERY'S HANDBOOK 28TH EDITION IS NEW TO KBC AND IS \$125.93.

Admit it. You're not like all other guys. When someone comes to you with an exasperated "This simply can't be done", you're not the guy to sit back and commiserate. You don't reminisce about all those tough jobs, those seemingly impossible scenarios, those big-fat head-scratchers. You? You hear those words and feel a little bubble of excitement rise in your belly. You hear "can't" and the goosebumps start. You hear "tried everything" and you get a little tingly all over. Because doing that thing that can't be done? That's why you're here, that's who you are, that's what you live for. And that's why people come to you when all else fails, and nothing's going right.

You're the master...The ninja. The guru...You're our kind of guy. And that's why in the middle of your desk, proudly sits that tattered old copy of the Machinery's Handbook you've had since 1992. Sure, it's old, it's frayed, but it works, right? So, you have to page through chapter after chapter to find information you need, and well, yeah the standards are a bit out of date, and maybe it doesn't really cover all the latest technological advances...Now wait a second... you're not telling me that you're willing to stake your reputation as the "guy who can do anything" because you haven't bothered to pick up the new Machinery's Handbook? You haven't taken advantage of the new formatting? The huge increase in math coverage? The new and revised material? The updated standards? The interactive equations? My friend, the times are changing, and if you don't keep up? There's another guy waiting to take over the throne.

My advice? Call KBC. We'll send you out the newest edition of the industry "bible" Want the guide? We've got it. We've even got great deals on the CD-ROM edition, which offers the interactive math for calculating critical equations... speeds, dimensions, moments of inertia, screw threads, center of gravity, hardness, volumes, tapers, matrices... the CD-ROM not only does it all, but does it faster. So get up to date, and keep that crown for "King of the Toolroom" right where it belongs... seated firmly on your head.

SO COME TO KBC TOOLS AND GET THE GREATEST HANDBOOK YOU'LL EVER NEED. IT ALSO COMES IN CD ROM VERSION, AND LARGE PRINT EDITION. YOU'LL BE FOREVER "THE MASTER...THE NINJA...THE GURU...OUR KIND OF GUY. THE GUY WHO CAN DO EVERYTHING...
