Milwaukee Introduces New 15 amp Super Sawzall® Reciprocating Saw *The Fastest, Most Durable Reciprocating Saw*

MILWAUKEE, WI –Milwaukee Electric Tool Corporation has been setting the standard for reciprocating saws since the launch of the first Sawzall® in 1951. Milwaukee continues to revolutionize the reciprocating saw category with the new 15 amp Super Sawzall® Reciprocating Saw (6538-21), the fastest, most durable reciprocating saw on the market.

The 15 Amp Super Sawzall® Reciprocating Saw offers best-in-class performance in the areas that contractors demand the most, including:

Durability:

The 6538-21 is the most durable reciprocating saw on the market. The 15 amp motor provides the highest overload protection in the industry. The patented Gear Protecting Clutch™ extends gear and motor life by absorbing sudden blade lock-up.

Power:

The 6538-21 is the most powerful reciprocating saw on the market. The 15 amp motor with Constant Power Technology™ maintains constant speed and power under cutting load.

Ease of Use:

The 6538-21 has a patented Counter Balance Mechanism™ that produces extremely low vibration levels. This allows the contractor to work longer without becoming fatigued.

The new Super Sawzall® recip saw is backed by Milwaukee's five year tool warranty.
