Milwaukee Introduces New M12 Cordless Flashlight

MILWAUKEE, WI – Milwaukee Electric Tool Corporation introduces a new M12 Flashlight designed to provide hands-free light in a compact and lightweight package.

Featuring a 90° rotating head, the M12 Flashlight allows light to be projected in any direction. The 49-24-0145 utilizes a 12V LITHIUM-ION battery to provide longer run time and features a Xenon incandescent bulb that maximizes brightness of the beam over a specific work area. An integrated magnet provides hands-free use and a lightweight, compact design provides superior durability and portability.

The 49-24-0145 is backed by Milwaukee's 5-year tool warranty.

Key Features

- 90° pivoting head
- Ergonomic, compact, and lightweight design for operator comfort
- Integrated magnet

Specs

- Xenon incandescent bulb
