Milwaukee Introduces New M12 1/4" Hex Impact Driver

MILWAUKEE, WI – Milwaukee Electric Tool Corporation introduces a powerful new M12 1/4" Hex Impact Driver, ideal for a wide range of applications including electrical work, plumbing, MRO, HVAC and finishing work.

Delivering a best-in-class 850 in/lbs. of torque in a compact, lightweight package and weighing less than 2.5 lbs., the 2450-22 is powerful enough to drive fasteners up to 75 percent faster and offers up to 2X longer run-time. The quick bit-loading 1/4" Hex chuck enables bit insertion and release to be done with one hand.

Weighing only 2.3 pounds, the compact size and weight allows access to tighter areas and reduces user fatigue. A 12V LITHIUM-ION battery and 0-3,000 IPM provide longer run time and more impacts per minute for optimum performance. Additional features include a Battery Fuel Gauge that displays the remaining run time and a Built-in LED Light that illuminates the work surface for added visibility.

Backed by Milwaukee's 5-year tool warranty and 2-year battery warranty, the 2450-22 comes with two 12V LITHIUM-ION batteries, one 30-minute charger and a carrying case.

Key Features

- 12V LITHIUM-ION battery offers longer run-time and fade-free performance
- Quick bit-loading 1/4" Hex chuck enables bit insertion and release to be done with one hand
- Variable speed trigger designed for output power control
- Battery Fuel Gauge displays remaining run-time
- Built-in LED Work Light for added visibility

Specs

- Torque: 850 in/lbs.
- Weight: 2.3 lbs.
- RPM: 0-2,000
- IPM: 0-3,000
- 12V LITHIUM-ION battery
- Total Length: 6 1/2"
- Chuck: 1/4" Hex
