Milwaukee Introduces New M18 6½" Circular Saw

MILWAUKEE, WI – Milwaukee Electric Tool Corporation introduces the new M18 6½" Circular Saw that is designed to provide powerful lightweight cutting for a variety of applications including plumbing, electrical, framing, finishing and carpentry.

The 2630-22 is a high performance circular saw that delivers the most durability in a cordless saw. Its powerful 3,500 RPM motor easily and quickly cuts tough material such as LVL headers. Magnesium upper and lower guards provide best-in-class durability to protect the blade from drops. The soft-grip handle is ergonomically designed to provide superior comfort and balance for easily controlled cuts. An easy-to-read aircraft aluminum shoe provides a light weight durable shoe and greater accuracy in rip cuts. The 2630-22 features an 18V XC High Capacity LITHIUM-ION battery that provides longer run-time and up to 20 percent more torque for powerful cuts. The Battery Fuel Gauge displays remaining run-time.

Backed by Milwaukee's 5-year 2,000-charge warranty, the 2630-22 comes equipped with two 18V XC High Capacity LITHIUM-ION batteries, 1-hour charger and carrying case.
